

Genomic, genetic and phenomic plant data at the INRA URGI : GnpIS.

Training on Triticeae

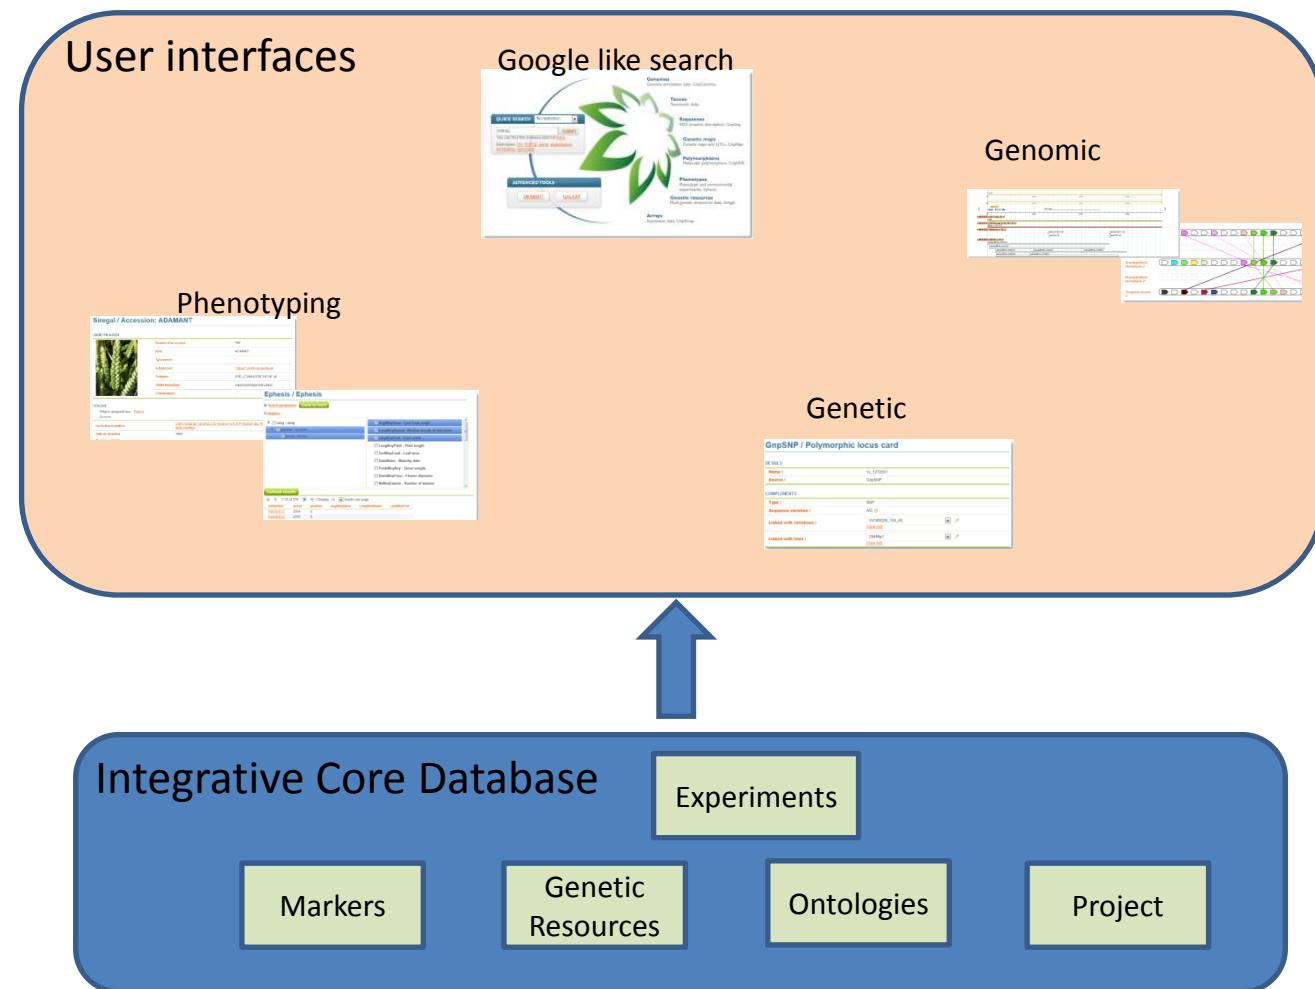

- GnplS presentation
- Part I, Wheat Genomic resources
 - Quick tour of private sections
- Part II, Genetic resources and Phenotyping
- Part 3 : Data set building with Biomarts

GNPIS PRESENTATION

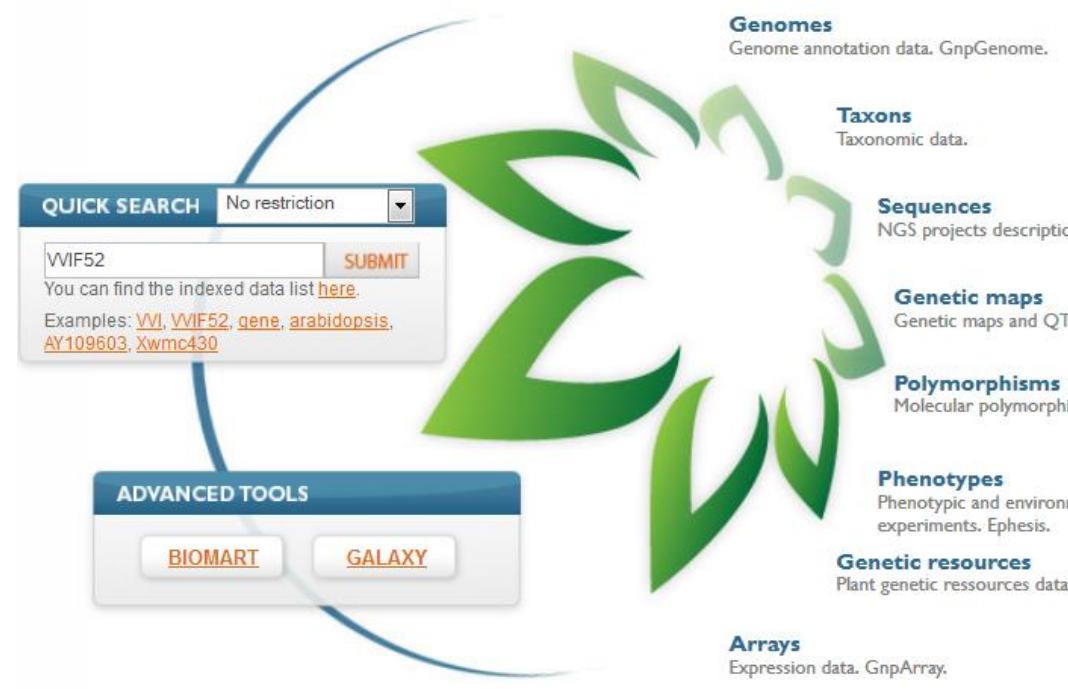

GnplS, URGI's Information system

- Information system
 - Integrative
 - Multi thematic
 - Genetic
 - Genomic
 - Phenotyping
 - Multispecies

User interfaces

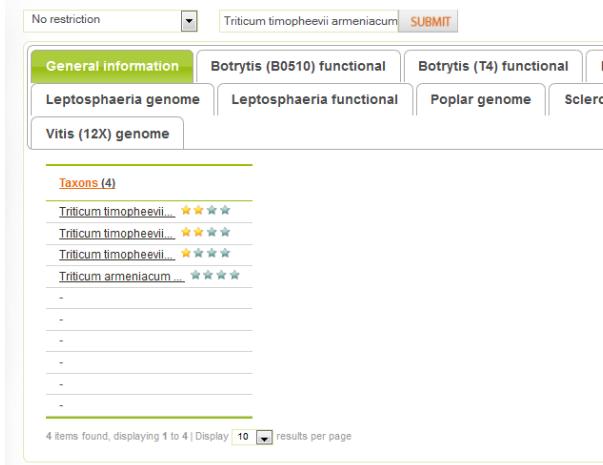

- Query, navigate, export data
 - Integrative/transversal tools
 - Thematic tools.

User interfaces

Integrative and transversal tool

- Quick search interface
 - URG development
 - Apache Lucene : full text search
 - Google like search on GnpIS
 - Entry point for thematic tools
 - Wheat portal <http://wheat-urgi.versailles.inra.fr/>
- Advanced search : Biomart
 - Datamart
 - Aggregation/Computation of GnpIS core database
 - Designed for a specific questioning : fact with attributes with dimension for filtering.
 - Multicriterion based dataset building
 - Available data marts
 - Genetic maps (markers, QTLs), Polymorphisms (snps, genes), Genetic and Phenotype resources with Genes annotations
 - Grapevine structural and functional annotation with Genetic maps (genetic markers)
 - Wheat, structural annotation with Genetic maps (genetic markers..) and Polymorphisms (snps)
 - Genes functional annotation
 - Arabidopsis Thaliana TAIRV10, Zea mays ZmB73, Populus trichocarpa, Botrytis cinerea T4, Botrytis cinerea B0510, Sclerotinia sclerotiorum, Leptosphaeria maculans
- Advanced Search and pipeline: Galaxy

The screenshot shows a search interface for a specific taxon. At the top, there is a dropdown menu set to "No restriction" and a search bar containing "Triticum timopheevii armeniacum". A "SUBMIT" button is located to the right of the search bar. Below the search area, there are several tabs: "General information" (which is highlighted in green), "Botrytis (B0510) functional", "Botrytis (T4) functional", "Leptosphaeria genome", "Leptosphaeria functional", "Poplar genome", and "Sclero...". Under the "General information" tab, there is a section titled "Taxons (4)" with four entries: "Triticum timopheevii" (with a 4-star rating), "Triticum timopheevii" (with a 4-star rating), "Triticum timopheevii" (with a 4-star rating), and "Triticum armeniacum" (with a 4-star rating). Below this is a list of items starting with "-". At the bottom of the interface, there is a message indicating "4 items found, displaying 1 to 4 | Display 10 results per page".

Dedicated thematic interfaces

WHEAT GENOMIC RESOURCES

Exercise 1.1

- Entry point <http://wheat-urgi.versailles.inra.fr>
- I want all information on loci Xcfb6012-3B
 - Any marker ? If yes :
 - Type, name
 - What are the positions on the Genetic Maps ?

Exercise 1.1, solution

- Loci Xcfb6012-3B

Wheat ▾ Xcfb6012-3B SUBMIT

Wheat physical map: 3B v1 Wheat physical map: 3B v2 Genetic mapping

Loci (1)

Xcfb6012-3B ★★★★ 1 items found, displaying 1 to 1 | Display 10 results per page

Exercise 1.2

- Display loci Xcfb6012-3B 's region on 3B V1 physical Map
- Is Xcfb6012-3B 's located on any physical BAC, is there any nearby annotation ?
 - Find Xcfb6012-3B contigs and deletion bin
 - Identify the First physical BAC
 - On Annotation Browser (Wheat annotation viewer v2), find one mRNA colocalised with this physical BAC and display the sequence
 - What QTL is colocalised on this BAC. What is the associated Trait ?

Exercise 1.2, solution

- Display loci Xcfb6012-3B 's region on 3B V1 physical Map
- Is Xcfb6012-3B 's located on any physical BAC ?

Exe

- Is Xcfb6012-3B 's located on any physical BAC, is there any nearby annotation ?
- Copy / paste

PART 3 : DATA SET BUILDING WITH BIOMARTS

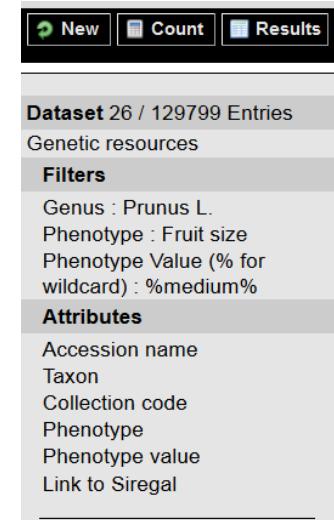

Exercise 3.1

- Siregal thematic interface limitation
 - Growth class annotated data filter only.
 - To add value filter
 - Biomart now
 - Planned development for siregal thematic interface
- Go to Biomart
 - <http://urgi.versailles.inra.fr/biomart/martview/300678dc6dcb13b10e1dc6b318d6a84>
 - Choose genetic resources dataset
- I want all Spring accession of genus triticum
 - Growth class = %Spring%

Exercise 3.3

- Genetic resources dataset Phenotypes are Primary phenotypes
 - Constant for all individuals
 - Assumed more or less independant from the environment
 - Fruit size, fruit color, Mean LAI, etc...
- I want to study the variability of Primary phenotypes in experiments.
 - Prunus has a lot of public data
 - Exercise 3.2: I want all prunus with medium fruit size.
 - Exercise 3.3: Get all experiment data
